Land Facility

The Land Facility (LF) is a global programme funded by the UK Foreign, Commonwealth and Development Office (FCDO) that supports governments to design, implement, and sustain land governance reforms.

Guiding the implementation of a new land regulation in Indonesia

Land Facility is supporting practical, sub-national pathways to implement Indonesia's new customary land regulation, turning national policy into secure and inclusive customary land rights.

Main partners: Landesa

Duration: Aug 2025 – Mar 2026

Country: Indonesia

Objective: Land Facility is supporting the Government of Indonesia to operationalise ATR/BPN Regulation 2024/14 by developing practical, sub-national policies and procedures that enable the consistent and inclusive registration of customary (ulayat) land rights. Through targeted technical assistance in selected provinces and regencies, the Land Facility will help translate the new national regulation into implementable guidance, strengthen institutional capacity, and sustain momentum for protecting Indigenous land rights at scale.

Project goals

- **Translate national regulation into sub-national practice** by supporting provincial and regency land offices to develop, consult on, and adopt policies, standard operating procedures, and instructions for customary land registration.
- **Strengthen institutional capacity and coordination** through rapid tenure assessments, public consultations, and training of national and sub-national ATR/BPN officials and customary councils, with a gender-integrated approach.
- **Demonstrate early implementation and learning** by supporting pilot roll-out in selected regencies, generating evidence and lessons to inform wider national scaling and future Land Facility engagement.
