Land Facility

The Land Facility (LF) is a global programme funded by the UK Foreign, Commonwealth and Development Office (FCDO) that supports governments to design, implement, and sustain land governance reforms.

Land rights, natural resources governance, and climate change in Eastern Chad

Land Facility identifies land governance constraints and practical, conflict-sensitive options that support a transition from humanitarian assistance to sustainable, climate-resilient livelihoods in Eastern Chad.

Main partners: Tetra Tech ARD

Duration: Aug 2025 – Jan 2026

Country: Chad

Objective: This project aims to facilitate conflict-sensitive programming by integrating land governance analysis within FCDO-supported programmes in Chad. An assessment of land and resource governance in relation to climate change, land degradation and displacement in Eastern Chad will help identify issues and options for conflict-sensitive programming in support of the FCDO Climate Resilience in the Sahel Programme (CRISP), in partnership with the World Food Programme.

Project goals

- **Improve the capacity of FCDO and CRISP partners** to apply land and resource conflict-sensitivity in programming, with a focus on land restoration areas within Eastern Chad under the Haguina Programme.
- **Identify land governance issues and solutions** that enable a transition to food security, self-reliance and sustainable livelihoods, including options related to International Climate Finance (ICF).
- **Capture and channel local and regional best practices** into broader global learning on the nexus of humanitarian and development assistance.
